Interests

- Travelling
- Playing Football

Languages

- Turkish
- English

I completed my 4-year education at Istanbul Bilgi University, Department of Electrical and Electronics Engineering. After my education, I worked as a Research Intern at University of Coimbra for 8 months. Right after, I started to work at Nagarro + MBIS as SAP Production Planning Consultant. I want to implement and manage national and international projects in a workplace where I can use my experience, exhibit my technical knowledge and skills, and be useful. In line with this goal, I continue to improve myself with the principle of lifelong learning.
